

Past Month Binge Alcohol Use among Missouri and U.S. Youth and Young Adults

	2005-2006	2006-2007	2007-2008	2008-2009	2009-2010	2010-2011	2011-2012	2012-2013
U.S. Ages 12-17	10.10%	10.00%	9.25%	8.82%	8.38%	7.63%	7.31%	6.73%
Missouri Ages 12-17	10.77%	10.31%	9.47%	8.80%	9.55%	8.46%	7.60%	7.46%
U.S. Ages 18-25	42.02%	41.99%	41.40%	41.35%	41.15%	40.15%	39.65%	38.70%
Missouri Ages 18-25	46.90%	44.60%	43.37%	42.44%	39.61%	37.75%	39.37%	40.74%

Title	Past Month Binge Alcohol Use among Missouri and U.S. Youth and Young Adults
Definition	5 or more drinks on the same occasion on at least one day during the one-month period preceding the survey
Methodology	Overlapping 2-year rate estimates from Missouri and U.S. survey samples for age groups 12-17 and 18-25
Data Source	National Survey on Drug Use and Health, U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration
Data Note	Apparent U.S. and Missouri differences in estimates, and year-to-year increases and decreases, might be statistically insignificant due to survey sampling.
